55 The second point which requires attention is preparation in advance to receivable the present primary-secondary school population. The text books now in use in Chimse schools are full of vilification of the US and of falsification of facts. The US authorities should obtain copies of these text books, study thems and prepare revised versions for future use, as well as documented rebuttals of false statements for immediate use

This matter of the re-education of the present day school children is of primary importance. They have known only the Communist regime and are unable unaided to detect false statements or to make comparisons. The danger is of a new generation of Chinose who are all convinced Communists.
